

2005 DAMON DAYBREAK

Bush Creek Arch Bridge. Baxter Springs, Kansas

You've just found the most motorhome for the money. DayBreak.

THIS COULD BE THE START OF SOMETHING GREAT.

If you're just beginning your journey down the long, winding road of RVing, there's no better place to start than behind the wheel of a DayBreak™ Motorhome.

Perfect for the cost-conscious first-time owner (or anyone who appreciates exceptional value), DayBreak offers considerably more than just about any similarly priced competitor. It's a big, full-size wide body with all the power and performance you need to climb mountains. DayBreak is richly appointed, with a long list of amenities you'd typically

find in high-end coaches. In fact, the only thing missing is the big price tag. The Damon Class A DayBreak is priced about the same as a typical mini motorhome.

DayBreak. No other motorhome offers you so much for so little.

LUXURY AMENITIES

For 2005, DayBreak now offers a larger TV in the front overhead — 25 inches, to be exact.

DayBreak provides a full basement, including a massive pass-through storage compartment.

Aerodynamic gelcoated front and rear fiberglass caps offer the sleek look of a higher priced motorhome.

The Carrier® roof-mounted air conditioner has a remote-controlled thermostat so you can easily adjust temperatures from inside.

Superior sound comes from the standard AM/FM/CD player located in the dash.

FLOOR PLANS

Damon offers a variety of floor plans and options. All provide the roomiest, most convenient mobile living experience you've ever had.

2960 LE

Seatbelts for eight • Walk-through bath • Pantry

2965

Living-area slideout • Bedroom slideout • Under 30 feet

3060

Seatbelts for eight • Pantry • Non-slide model

3270

Living-area slideout • Two sofas in living area • Seatbelts for six

3272

Living-area slideout • Bedroom slideout • L-shaped kitchen

3295

Best storage capacity in class • L-shaped kitchen • Private stool area

MORE OF WHAT SETS US APART.

DayBreak provides extra strength, rigidity and durability with its five-layer vacuum-bond laminated sidewalls with full aluminum framing.

Our heated holding tank area lets you travel year-round in most climates.

It's easier to enter and exit the captain's chairs with DayBreak's "easy step" low-profile engine cover.

Four-point hydraulic leveling jacks on all slideout models are semiautomatic and operate with an electric touchpad.

Solid handcrafted wood cabinet doors with mortise and tenon joints provide long-lasting beauty.

Our rack-and-pinion electric slideout system is efficient and reliable.

You can use laptop computers, telephones and other electronic devices in the cockpit with passenger-side 110-volt/12-volt outlets and telephone jack.

DayBreak's optional driver's side door offers a slider window and lock for added convenience.

SIDEWALLS

Walls are vacuum-bond laminated for added strength and rigidity.

Sidewalls are five layers thick, consisting of:

- Exterior fiberglass
- Wood backer
- Aluminum frame
- Bead-foam insulation
- Interior wallboard

FLOOR

A water-resistant, Structurwood® floor supports the living area. Framed in 1.5-inch welded-steel tubing, it's insulated with solid bead-foam and protected with a galvanized underbelly, which resists rust and corrosion.

BUILT WITH A REMARKABLE BALANCE OF STRENGTH AND SOPHISTICATION.

ROOF

DayBreak's roof is vacuum-bond laminated for superior strength and rigidity. It features an aluminum rafter support system with bowed rafters to maintain the roof's crowned shape. A crowned roof permits better water runoff, which helps prevent leaks.

BASEMENT AND STORAGE

DayBreak basement construction incorporates a strong, welded-steel truss system. Trusses are horizontal for better weight distribution. They also allow for DayBreak's full basement and massive pass-through storage.

UTILITIES

DayBreak's heated holding tanks and fully contained plumbing systems let you travel in most any season. Tanks are mounted horizontally for easy servicing and maintenance.

CHASSIS

Quality construction starts here. And DayBreak uses only the finest: either a rugged Ford® or Workhorse® chassis, depending on the floor plan.

From the busy streets of downtown Chicago to the Santa Monica Pier, Route 66 twists and turns for 2,297 miles.

HAVE IT YOUR WAY.

Now it's time to choose your favorite fabrics, paint colors, wood styles, floor plans and other options. No matter which model and design package you choose, you can be assured that every DayBreak Motorhome we make is built the same way — the right way — with the same high-quality materials, components and state-of-the-art construction techniques.
