Unloaded Vehicle Weight (UVW): Sometimes referred to as "Dry Weight," UVW means the typical weight of this trailer as built at the factory. The UVW, as used in product literature and other promotional materials, does not include cargo, fresh water, propane, options or dealer-installed accessories.

Gross Vehicle Weight Rating (GVWR): GVWR means the maximum permissible weight of the trailer, including the UVW plus personal items, all cargo, fluids, options and dealer-installed accessories. The GVWR is equal to or greater than the sum of the UVW and the CCC.

Cargo Carrying Capacity (CCC): CCC means the maximum weight of personal items, food, fresh water, propane, tools, other cargo and dealer-installed accessories that can be carried by the trailer. CCC is equal to or less than GVWR minus UVW. The addition of options will decrease the CCC.

Hitch Weight (HW): The hitch weight, as used in product literature and other promotional materials, does not include cargo, fresh water, propane gas, options or dealer-installed accessories. The addition of these types of items will either add to or subtract from the stated hitch weight.

It is important for your safety and enjoyment that your tow vehicle be adequately sized and equipped to tow and handle the GVWR of the RV you select. Review weights and rating of your tow vehicle and consult a competent advisor for questions or advice. Whether you are new to RVing or a veteran, get a feel for the performance of your tow vehicle before heading out on the roadways. When you tow an RV, you must drive differently than when you drive a single vehicle. Practice hooking up, driving, backing up and braking in a safe environment or seek out professional instruction. Jayco affixes a weight label to each RV which lists weight information for that vehicle. See specifications charts above.

CLIMATE SHIELD

CLIMATE*SHIELD*

LIVING ROOM	KITCHEN	BATHROOM	HOLDING TANK	BEDROOM
0°F 70°F	0°F 69°F	0°F 71°F	0°F 60°F	0°F 71°F
100°F 69°F	100°F 70°F	100°F 68°F	100°F 72°F	100°F 71°F

Extend your camping season with the Jayco Climate Shield™.

It protects against extreme heat and extreme freezing—even in temperatures as high as 100 degrees or as low as zero degrees (Fahrenheit).*

Scan the QR code to see the Climate Shield video.

*Unit was tested in zero degrees F and 100 degrees F weather over an extended period of time in a controlled environment, and all functions of the coach were fully operational, including full fresh water tanks. Testing was done in a completely controlled environment; therefore, temperatures during testing may not represent actual temperatures in nature and cannot account for elements such as wind or moisture. In actual use, unit may not perform as well. Supplier of cooling components does not guarantee anything better than 20 degrees difference from ambient temperature. In addition, outside components are subject to freezing and require steps to properly insulate. Jayco's warranty does not cover damage caused by freezing. To learn more about Climate Shield and testing done by Jayco, visit www.jayco.com.

TAKE A RIDE ON THE CAREFREE SIDE

Designed for camping comfort and convenience, Jayco RVs provide an easy-going, family-fun experience that relieves your stress. With countless features and reliable construction, you'll breathe easy no matter where your adventures take you and yours.

THE JAYCO DIFFERENCE

1. **Vacuum-bonded walls and fiberglass exteriors** for better protection from the elements (n/a on Octane Super Lite)
2. **Magnum Truss™ Roof System** withstands 4,500 pounds—50 percent more than other roofs
3. **Welded aluminum frame** for a durable, lightweight structure (n/a on Octane Super Lite)
4. **2-inch, vacuum-bonded and insulated garage floors** aren't found on most competing toy haulers, and deliver added durability for your heavy toys
5. **D-rings rated for 2,500 pounds** are mounted through the vacuum-bonded floor and bolted to a steel plate attached to the frame; some manufacturers don't add this extra reinforcement
6. **Double layer of fiberglass insulation** behind the front cap, plus Flexfoil® and fiberglass insulation in the floors to provide extra warmth where it's needed most—in the bedroom, bathroom and living rooms
7. **Aerodynamic front cap** withstands the rigors of the road with infused paint and gelcoating, plus ¼-inch plywood bracing for additional support—not typically found on competing fifth wheels

Jayco

Generations of family fun.
